# Multi-model machine learning system (MMML)

What is MMML

it is (MULTIMODEL AI SYSTEM) . an intelligent entity that understands multi-modular data (images,text,audio,mechanical I/o) And makes inference based on its intelligent

Description

The model takes an input from the user as (text or audio) .
Then the user can prompt the model with an image and then asks the model for
Inference about it .
Then the model will generate the response as a (text or audio).
